

Hygiene in livestock farms

Itram Higiene focuses its activity in the field of hygiene in the food and agri-food industry.

We manufacture a wide range of chemical specialties, detergents and disinfectants, application systems, dosing, methods for microbiological surface control, and offer technical advisory services, analysis laboratory microbiological and consultancy specialized in food hygiene.

We form a multidisciplinary team that together provides a solid foundation that guarantees a high level of professionalism. Most of the people and distributors that make up ITRAM HIGIENE are professionals who have proven experience and knowledge in the field of food and livestock hygiene.

HYGIENE IN LIVESTOCK FARMS

Maintaining good hygiene is one of the most important and simple preventive measures to reduce the incidence of diseases on livestock farms.

This includes proper cleaning of both animals and the facilities where they are set aside, and then a correct disinfection protocol to destroy infectious or parasitic agents responsible for animal diseases.

Itram Higiene offers a range of products intended for these purposes, differentiating products for hygiene of milking, pre-dipping and post-dipping equipment, cleaning and disinfection of farms and specialties.

INFORMATIVE PICTOGRAMS ON ALL PRODUCT LABELS

Type of product

Type of application

Hygiene on milking circuits and equipment

BRIO CLOR

Foam-controlled chlorine alkaline detergent based on sodium hypochlorite.

ACIMIX PLUS

Non-foaming descaling based on phosphoric acid and surfactants.

ACIMIX CIP

Strongly acid descaling foam-controlled detergent. Based on nitric acid and surfactants.

ACIMIX G

Non-foaming descaling based phosphoric acid and surfactants.

BRIO BASIC

Controlled foam caustic detergent.

BRIO COMPLEX PLUS

Highly additive alkaline detergent for single-phase cleaning.

BRIO SPRAY

Foam-controlled alkaline detergent. Low freezing point.

BACTOTRAM 500

Foam-controlled disinfectant based on alkylamine.

BACTITRAM OXY 5

Peracetic acid-based disinfectant 5%.

Nipples hygiene

Before milking (pre-dipping)

UBRITRAM (pre)

Hygienizing and dermoprotective cleansing gel based on chlorhexidine digluconate enhanced with a easy-to-clear quaternary ammonium derivative.

OXITRAM (pre)

Hygienizing foam based on lactic acid and chlorhexidine.

Before and/or after milking (pre and post dipping)

YODITRAM (pre y post)

Hygienizing nipple bath based on 2,500 ppm iodine povidone.

MAMITRAM (pre y post)

Hygienizing nipple bath based on 5,000 ppm chlorhexidine digluconate.

After milking (post dipping)

POVITRAM (post)

Thick nipple bath based on 2500 ppm iodine povidone.

YODIMIX (post)

Thick high-tech nipple bath based on iodophores and iodine povidone with more than 9,000 ppm.

LACTITRAM (post)

Thick nipple bath based on lactic acid.

LACTITRAM PLUS (post)

Thick nipple bath based on lactic acid with levuricidal properties.

MASTIDIP 1 Y 2

Nipple bath 2 components. It releases chlorine dioxide.

MASTITRAM DUO 1 Y 2 (post)

High-tech nipple bath based on concentrated chlorine dioxide.

UBRIDIP

Sealant in chlorhexidine base (5,000 ppm) with softeners and emollients.

YODIP

Sealant in iodine base (6,000 ppm) with softeners and emollients.

Cleaning and disinfection of farms

ALCA JET

Foaming alkaline detergent.

FOR JET

Foaming strongly alkaline detergent.

VIRUFIN

Disinfectant of livestock installations and animal transport vehicles based on quaternary ammonium and glutaraldehyde.

Drains and slurry

NEUTROLOR

Odor neutralizer and odor remover formulated on base of essences.

TRAPURÍN

Product in order to neutralize odors and liquefy the slurry.

Hooves hygiene

ITRASAN

Hoof hygienizing baed on formaldehyde and copper and zinc sulfide.

PODOSEP

Hoof regenerator for all types of cattle. Especially suitable for damaged hooves.
